### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claim 5, drawn to a partition wall is constituted of a bimetal, classified in class 123, subclass 306.
  - II. Claims 7-9, drawn to a communication passage, classified in class 123, subclass 316.
  - III. Claim 10, drawn to a stratification operation region, classified in class 123, subclass 295.
  - IV. Claims 11-14, drawn to a fuel injector for injecting directly a fuel into combustion chamber, classified in class 123, subclass 305.
  - V. Claim 15, drawn to a bypass passage for supplying an air into a cylinder, classified in class 123, subclass 302.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions of Group I, Group II, Group III, Group IV, and Group V are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions of Group I and Group II can be used in a materially different processing.

Art Unit: 3747

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their difference classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and Groups I-V are individually separated and distinct from each other.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II neither Group III, Group IV nor Group V, restriction for examination purpose as indicated is proper.

A telephone call was made to James F. Mckeown (Reg. No. 25,406) on Tuesday May 25, 2004, to request an oral election to the above restriction requirement, but did not result in an election being made; the Applicant's Attorney would like to receive the Action from the Examiner.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Art Unit: 3747
